JERIEL PRODUCTS

Jeriel Products, LLC, is a family owned and operated company proudly serving the Southeast since 2012. Specializing in architectural accents, we provide quality products including columns, shutters, vents, brackets and corbels. Our number one goal is not just to build and sell quality products to our customers but to become a vital part of their project team. The managing partners have a combined 70 years of experience in the construction industry. This experience allows Jeriel Products to manufacture quality products that add curb appeal to your project. Whether it is one of our standard products or one manufactured per your specifications, we will strive to meet your individual needs. You may purchase our products as a wholesale vendor or through a retailer in the Southeast.

ABOUT JERIEL

BRACKETS, CORBELS & BRACES

Gable brackets, corbels and braces are an excellent addition to the exterior of the home. They can also be used on commercial projects to add architectural interest and details.

These handcrafted pieces look great in free standing structures such as gazebos and pergolas and are a perfect way to dress up porches and entrances. These architectural elements will add dramatic character to your building project.

AVAILABLE IN:
WESTERN RED CEDAR,
PRESSURE TREATED
AND PVC

BRACES

PVC COLUMNS

Hand crafted, factory seamed-columns provide a superior finish with no joint separation due to expansion. Our columns are manufactured with 100% PVC materials for low-maintenance and no rotting. They are engineered to withstand even the toughest elements.

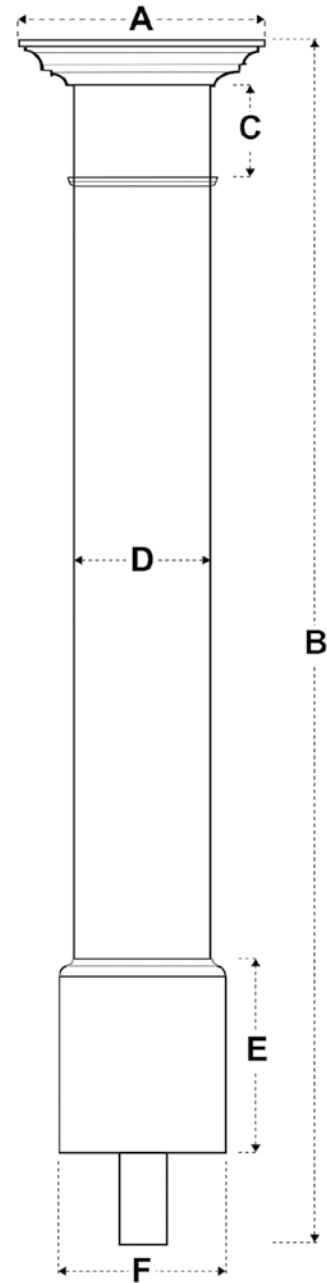

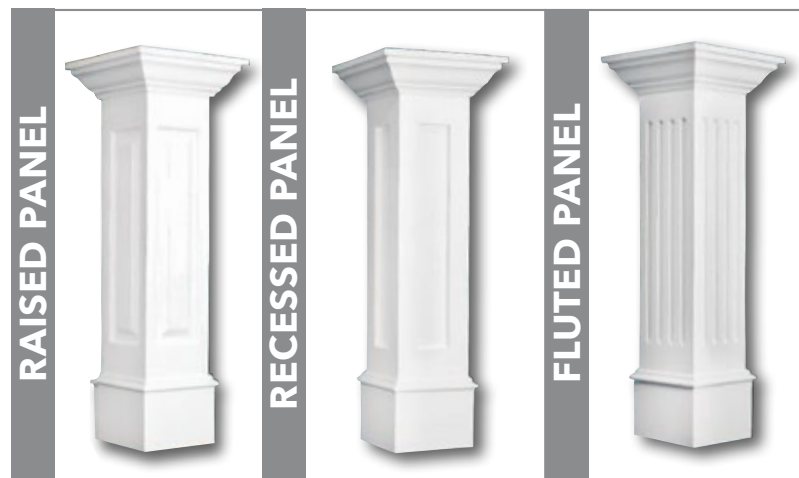

We offer sleek designs and simple installation. All of our columns can be manufactured to any specification you may require.

**Columns can also be made from cedar*

INSTALLATION OVER ANY
POST OR BEAM. SIMPLY
SLIP THE COVER IN PLACE,
GLUE AND CLOSE THE
OPEN SIDE FOLLOWING THE
INSTALLATION INSTRUCTIONS.
THEN ADD THE PRECUT
TRIM PIECES FOR A CUSTOM
FINISHED LOOK!

GABLE VENTS

Designed to be both beautiful and functional, gable vents (or louvers) have been used as design accents. We offer two basic types: functional (venting) and decorative (non-venting). They come in a multitude of materials and shapes to fit most architectural styles. Unlike other passive venting systems, such as soffit or ridge vents, gable vents are meant to be seen. They are made visible in the front of a building and add an architectural element to an otherwise invisible opening.

**Vent materials: cedar, PVC, pine and primed*
